## EXPERIENCE

---

### SFCC Back End Developer

Red Van Workshop | Remote | 2021 – Present

Red Van Workshop is a system integrator that specializes in Salesforce Commerce Cloud e-commerce system design.

### UI Developer III

Fossil Group | Remote | 2020 – 2021

Fossil Group is a collection of global brands including Fossil, Michele, Skagen, and Watch Station.

- Integrate third party LINK cartridges into existing Fossil sites
- Implement new product features
- Enhance the checkout process

### Full Stack Developer

Fenom Digital | Remote | 2020 – 2020

Fenom Digital is a consultancy that specializes in Salesforce B2C Commerce.

- Created a LINK cartridge for a User Generated Content platform
- Integrated third party LINK cartridges into existing Salesforce B2C Commerce sites
- Reviewed code submitted by team members

### Senior Consultant II

Capgemini DCX NA | Chicago, IL | 2019 - 2020

Capgemini Digital Customer Experience creates experiences that deliver rapid and sustainable value for customers. I became a part of the Capgemini DCX North America team after LyonsCG was acquired by Capgemini.

- Developed sites for clients such as Arlo using the Salesforce B2C Commerce platform
- Implemented updates and bug fixes to Salesforce B2C Commerce LINK cartridges
- Styled content for Honeywell Aerospace in the Adobe Experience Manager platform

### Applications Engineer

Lyons Consulting Group | Chicago, IL | 2017 - 2019

LYONSCG was one of the industry's premier eCommerce digital agencies. LYONSCG crafted digital experiences for online retailers, branded manufacturers, and B2B organizations.

- Developed sites for clients such as Gymboree, E.L.F. Cosmetics, NYDJ and Toys R Us using the Salesforce Commerce Cloud/Demandware platform
- Implemented features and apply bug fixes on the back end and client side using Javascript
- Styled sites with Sass according to designer compositions
- Created internal company tools using MySQL, Node.js, Express.js, and Vue.js
- Wrote automated tests using Mocha, Chai, WebdriverIO, TestingBot, Selenium, and Gulp

## **Contract Developer**

Actualize | Chicago, IL | 2016 - 2017

Actualize is a coding bootcamp and apprenticeship program. I was hired by the bootcamp to work on internal projects and digital agency style projects for clients after completing the bootcamp.

- Created augmented reality mobile apps with the Unity Engine and Vuforia SDK
- Built REST APIs with Ruby on Rails
- Created a custom CMS for clients

## **Web Developer Apprentice**

The Difference Engine | Chicago, IL | 2016

The Difference Engine is a non-profit 501(c)(3) organization that builds custom software and websites pro bono for other non-profit organizations. This was a 4-month apprenticeship program.

- Pair programmed with a team of 5 in an agile scrum setting, reported to and worked directly with a product owner and tech lead in 2 week sprints
- Committed and pushed work to GitHub diligently, created detailed pull requests for code review
- Deployed to Heroku as deployment manager, wrote unit tests for code with RSpec
